Payment FAQ

Answers to common questions about paying for your order, invoices and refunds. Kopbal is a fictional shop: payments are simulated on the TestPay page and no real money moves.

Which payment methods do you accept?

You can pay with iDEAL, Bancontact, credit card or PayPal. All prices are in euros (EUR) and include VAT.

When do I pay?

You pay right after placing your order. Until the payment is approved the order stays pending and the items are reserved for you. If you don't complete the payment, the order is cancelled automatically and the items go back into stock.

My payment was declined. What now?

Open the order on your order page and choose Pay now to try again, with the same or another payment method. Your items stay reserved while the order is pending.

Can I get an invoice with my company's VAT number?

Yes. Open a support ticket with your order number and your company name and VAT number, and we send a corrected invoice within 2 working days. Clubs and teams ordering several shirts can ask for one invoice for the whole order.

When will I get my refund?

Refunds go back to the payment method you used. A cancelled order that was paid is refunded straight away. A return is refunded within 5 working days after we receive it. Depending on your bank it can take another 2 to 3 days before the money shows up on your account.
