Product Care

What our products are made of and how to keep them looking good.

Shirts

Home, away and kids shirts are made of lightweight recycled polyester with a breathable mesh back and an embroidered crest. Retro shirts are made of a heavier cotton blend.

Wash inside out at 30 degrees with similar colours. Don't use bleach or fabric softener, don't tumble dry and don't iron the crest or the print.

Training tops

Quarter-zip training tops have a soft brushed inside. Close the zip before washing and wash at 30 degrees.

Scarves

Knitted scarves measure 140 x 18 cm. Wash them by hand in cold water and let them dry flat.

Balls and gloves

Match and training balls are size 5 and are delivered inflated. Keep them at a pressure of 0.8 bar. Rinse goalkeeper gloves in lukewarm water after use and let them dry away from a heater.
